

# Brake & Parts Cleaner

Fillable-type Brake and Parts Cleaner

**Cost reduction comes together with environmental protection!**

Waste bottles are greatly reduced by repeatedly refilling dedicated bottles.

## Features and Effects

- Powerful cleaning works for diverse applications.
- The refill system is economical, and the fill volume of the dedicated bottle is top in the industry's class.
- Operation is simple, and the filling pressure is high, making sure that every drop of cleaner gets used.

## Wide Range of Applications

- Cleans brake oil, resin powder, and other dirt off of brake linings, brake drums, and other areas.
- Cleans metal car components.
- Cleans and degreases before painting and other surface treatments.
